PROFESSIONAL SUMMARY

Dedicated Software Developer with **3 years of hands-on experience** building web applications, microservices architectures, and enterprise tools. Proven track record delivering production-grade solutions—from monolith-to-microservices migrations to AI-assisted RAG pipelines—while mentoring interns and managing end-to-end cloud deployments on Oracle Cloud Infrastructure. Strong problem-solver with deep expertise in Java, Spring Boot, React, and DevOps practices.

TECHNICAL SKILLS

Languages	Java, JavaScript, HTML, CSS, Python (basic)
Frameworks	Spring Boot, Spring Cloud, Hibernate/JPA, React (Vite), Node.js, Microservices (Eureka, API Gateway, OpenFeign, Resilience4j)
Databases	MySQL, Elasticsearch / Lucene (full-text search)
Cloud & DevOps	Oracle Cloud (OCI), Nginx, PM2, IIS Reverse Proxy, Docker (basic), CI/CD fundamentals
APIs & Tools	Zendesk API, Jira REST API, Eclipse IDE, VS Code, Git
Other	JWT Auth, RAG (Retrieval-Augmented Generation), ChromaDB, Sentence Transformers, FastAPI, Software Testing & QA, AI-assisted Development

PROFESSIONAL EXPERIENCE

Software Developer

June 2023 – Present (3 Years)

Vivekananda Technologies, Navi Mumbai

- Developed and maintained production web applications using Java, Spring Boot, and React.
- Architected and delivered the **Zendesk–Jira Ticket Intelligence Dashboard**—a unified 3-panel tool that reduced L1/L2 incident investigation from 15–20 minutes to seconds using a custom error-pattern matching engine (Java exceptions, SQL failures, null pointers, lock timeouts).
- Designed and built the **OKR Manager** (React + Spring Boot + MySQL + JWT) with real-time progress tracking, deployed on Windows Server via IIS reverse proxy.
- Led **monolith-to-microservices migration** of Workshop Management System using Spring Cloud (Eureka, API Gateway, OpenFeign, Resilience4j) with full React UI.
- Implemented a **RAG-based AI POC** (Python + FastAPI + ChromaDB + Sentence Transformers) to enable AI agents to answer queries from updated shared-drive documents instead of outdated CHM help files.
- Managed end-to-end **cloud deployment** of HR Management System on Oracle Cloud (OCI Always Free): Linux VM, MySQL, Node.js backend (PM2), React frontend (Nginx), security group & iptables configuration.
- Mentored interns through full development lifecycle—from feature design to production deployment.
- Utilized AI-assisted development tools to write optimized, maintainable code.

KEY PROJECTS

Zendesk–Jira Ticket Intelligence Dashboard (Internal Tool)

Stack: Spring Boot · Zendesk API · Jira REST API · Vanilla JS · HTML/CSS

- 3-panel dashboard: live Zendesk queue, intelligent historical ticket matching, auto-linked Jira issues.
- Custom error-pattern matching engine extracts stable signals (exception class, filename, SQL table, error codes) without hardcoded strings.
- One-click stack-trace / dump extraction; reduced investigation time from ~20 min to seconds.

Workshop Management System – Microservices

Stack: Spring Boot · Spring Cloud · Eureka · API Gateway · OpenFeign · Resilience4j · React · MySQL

- Migrated monolithic workshop app into 4 independently deployable services: Customer, Vehicle, Planning, Order.
- API Gateway as single entry point; Eureka for dynamic discovery; Resilience4j circuit breakers for fault tolerance.
- Full React UI with end-to-end flow: Create Customer → Vehicle → Planning → Order.

github.com/suryawanshi-dipak/workshop-management-system

OKR Manager

Stack: React · Spring Boot · MySQL · JWT · IIS Reverse Proxy

- Organizational OKR tracking app with objectives / key-results management and real-time progress.
- JWT-secured REST APIs; deployed on Windows Server via IIS; live at web.audev.com/okr.

RAG-based AI Help System (POC)

Stack: Java · Python · FastAPI · Sentence Transformers · ChromaDB

- Demonstrated feasibility of replacing outdated CHM help files with AI queries over live shared-drive docs.
- Built document indexing pipeline (chunking + embeddings) and /ask endpoint validated via FastAPI Swagger UI.

HR Management System – Cloud Deployed

Stack: React (Vite) · Node.js · MySQL · Nginx · PM2 · Oracle Cloud (OCI)

- Full-stack HR platform on OCI Always Free Tier; handled all DevOps: VM setup, PM2, Nginx, security rules.

Notes App

Stack: Spring Boot · Elasticsearch/Lucene · HTML · CSS · Render

- Full-text search with Spring Data + Elasticsearch; Markdown support; multi-tag organization.

notes-app-g0qg.onrender.com

ExcelGraphify | News Portal | Tic-Tac-Toe

Stack: HTML · CSS · JavaScript · Netlify

- ExcelGraphify: upload Excel → generate interactive bar/line/pie/scatter graphs; export as image or PDF.
- News Portal: real-time news via third-party APIs; responsive layout. Live: newsmatrix.netlify.app
- Tic-Tac-Toe: player turns, win/tie detection, reset. Live: dynamicictactoe.netlify.app

EDUCATION

Bachelor of Science (B.Sc.)	Bharati Vidyapeeth's Yashwantrao Mohite College, Pune	2023
Higher Secondary (12th)	Maharashtra State Board – English Medium	2019
Secondary School (10th)	Maharashtra State Board – Marathi Medium	2017

ADDITIONAL INFORMATION

Languages: English (Professional) | Hindi (Fluent) | Marathi (Native) **Interests:** Sketching, Cricket **Open to:** Navi Mumbai, Mumbai and surrounding areas
